// Digital sovereignty

Open Source Software as a driver for digital sovereignty

Modern digital environments follow the requirements of users - regardless of the manufacturer. **69%** of companies already use open source software, resulting in a complex mix of proprietary and open source software.

Open Source Solutions are becoming increasingly widespread in industry, administration and critical infrastructures. However, **78%** of companies do not have any automated OSS analysis tools.

National governments are increasingly committed to digital sovereignty and open solutions (digital strategy): More than 5 million workplaces are supported by ZenDis in the public sector in Germany alone with the OpenDesk and OpenCoDE projects.

Centralized, comprehensive IT management is essential for quality, stability and security.

Does your company have a strategy for using or participating in OSS?

No, there is no OSS strategy at all.
66 %

Yes, there is an OSS strategy.
32 %

2 %
Don't know / no answer

More security, more control & more efficiency with Raynet One

Similar to vendor-specific solutions, open source solutions must also be inventoried, packaged, deployed, patched, checked for vulnerabilities and managed under licensing law.
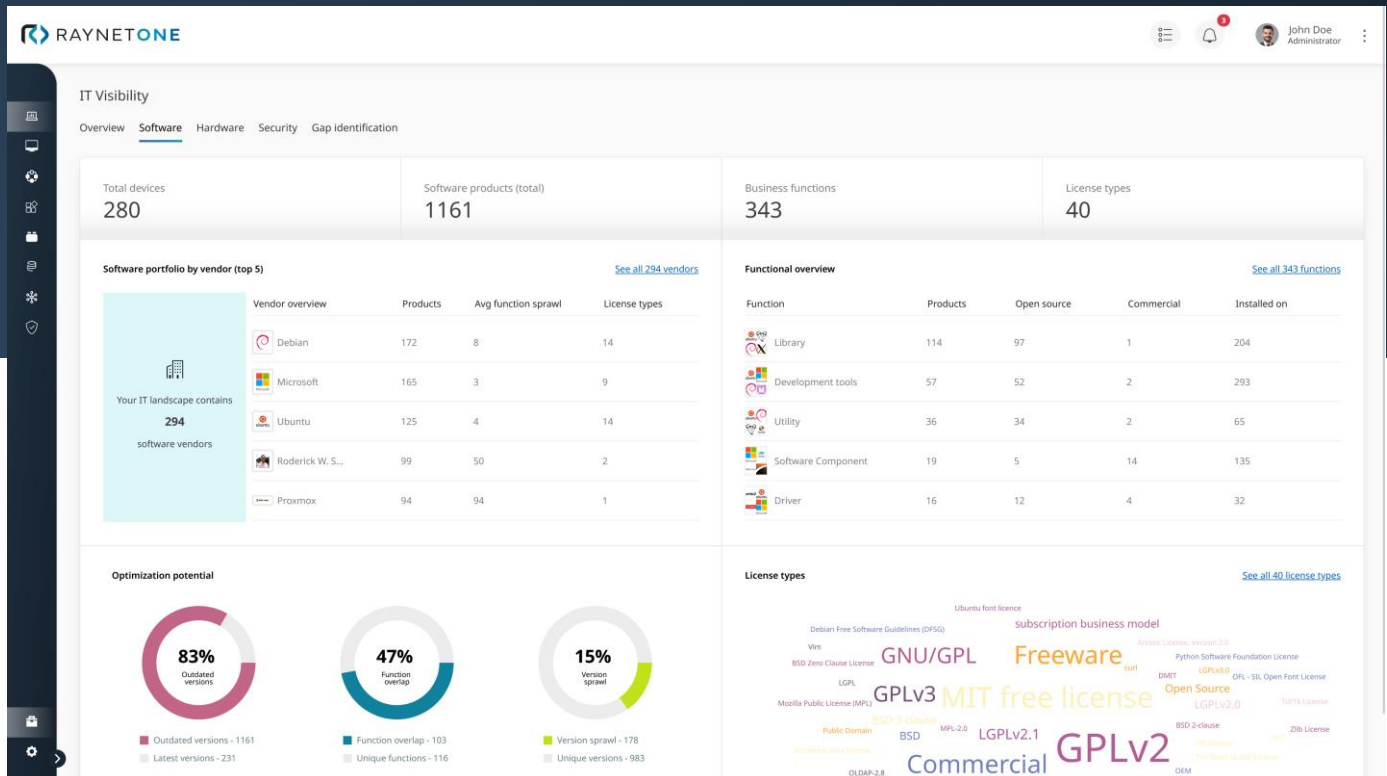

With more than 25 years of IT experience, as a member of the OSBA (Open Source Business Alliance) and head of the "Open Source Adaption" working group, we are actively involved in the open source ecosystem. With **Raynet One**, we have created a central platform for all IT challenges in the open source environment and in hybrid environments.

We also support companies in meeting the legal requirements of NIS-2, DORA, SFDR, SOX and GDPR.

Your benefits

- Get an initial overview of open source Software in just 10 minutes

- Close security gaps by monitoring the EoL & EoS status

- Automatically check your entire portfolio for software vulnerabilities

- Manage hybrid IT environments from a central platform

- Protect yourself from costly software audits

True IT Asset Visibility with Raynet One

Turn your IT initiatives into long-term IT success

Discover & Inventory

Protect & Streamline

Manage & Visualize

Why Raynet?

Because with Raynet One for True IT Asset Visibility, we create a single, reliable source for all IT assets to protect, optimize and manage complex IT systems.

As a global software manufacturer with market-leading solutions and complementary managed services, we make successful end-to-end management of IT projects and IT operations.

Following the **Discover to Manage** mission, our vision is for all companies worldwide to achieve transparency and security as well as the optimization of their IT investments through the use of our technologies.
