RAYNETONE

// End-of-Life & End-of-Support Management

Manage IT lifecycle data proactively and reduce security risks in your IT

Support for your IT assets ends when they reach End-of-Life (EoL) or End-of-Support (EoS). At the same time, security risks to your business increase dramatically when hardware or software assets reach EoL or EoS status faster than the business can replace or decommission them.

In addition to security risks, companies without regular support are exposed to legal and financial risks, as well as compatibility issues or even limited functionality.
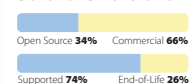

The central Raynet One Platform is the game changer for strategic EoL and EoS management, enabling you to plan securely for the long term without sacrificing IT.

Installed Products with most EoL
- Mozilla Firefox
- Google Chrome
- Notepad++
- Microsoft Word
- Adobe Acrobat DC

EoL Versions	289
EoS Products	130
EoS Versions	249

Software Portfolio

Open Source **34%**   Commercial **66%**

Supported **74%**   End-of-Life **26%**

## Protect your IT from cyber risks due to outdated assets

To get a complete overview of the EoL and EoS status of your IT assets, a technology catalog with millions of market data is essential. Our Raynet One Technology Catalog enriches your IT data with essential End-of-Life & End-of-Support information, uncovers obsolete or no longer supported software, and automatically checks the support status of your assets.

Raynet One processes these figures and transparently presents the most important KPIs in meaningful, individual, and interactive dashboards. It is precisely this visibility that enables companies to act early and proactively, plan strategic portfolio decisions, and minimize the risk of security breaches through product End-of-Life or End-of-Support.
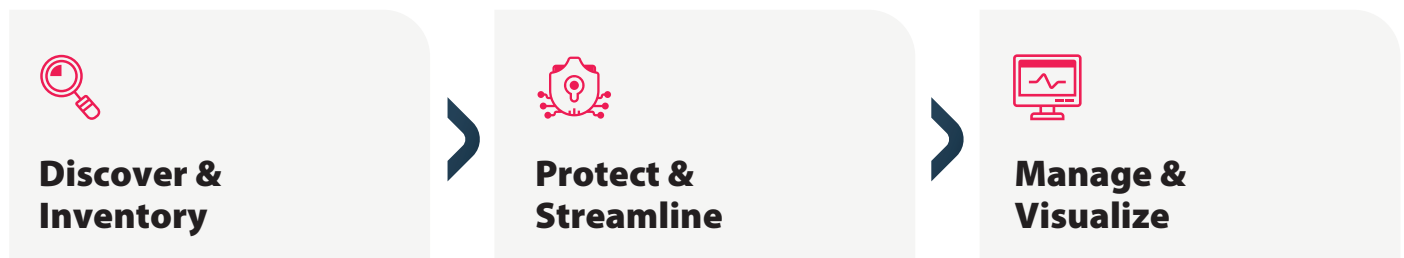

Your benefits

- Get initial results for your EoL & EoS assets in just 10 minutes

- Close security gaps by monitoring EoL & EoS status

- Reduce technical debt and take outdated devices off the grid

- Identify orphaned or obsolete IT assets and eliminate blind spots

- Reduce maintenance and support costs through proactive EoL & EoS monitoring
