RAYNETONE

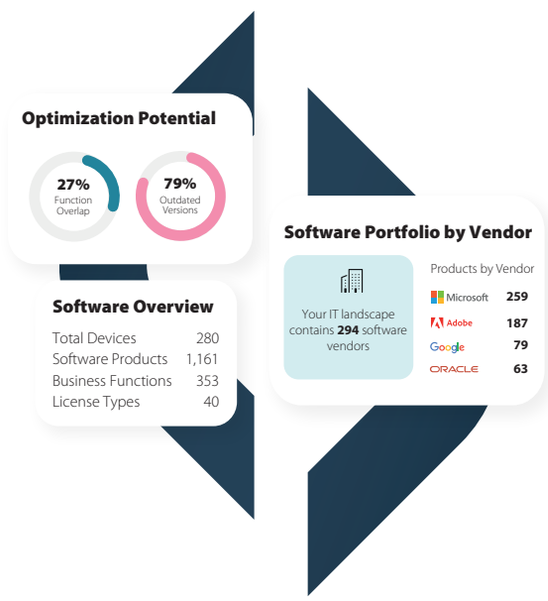
// IT Portfolio Optimization

Optimize your software portfolio and save unnecessary IT costs

Despite centralized software procurement and deployment, many companies are paying too much money for the operation and licensing of their software. According to Gartner, total spending on enterprise software will amount to 670 billion dollars in 2023, and the trend is rising.

In order to keep IT costs and the associated expenditure as low as possible, companies must have transparency regarding the installation and use of on-premises, SaaS, PaaS & IaaS applications.

This is the only way to make strategic decisions, save costs and optimize portfolios.



Reduce software sprawl while maintaining business functionality

Raynet One supports you in identifying costly and redundant applications within your IT landscape. Thanks to flexible inventory technologies and over 200 SaaS & Cloud connectors, you can gain initial insights into your software portfolio within minutes.

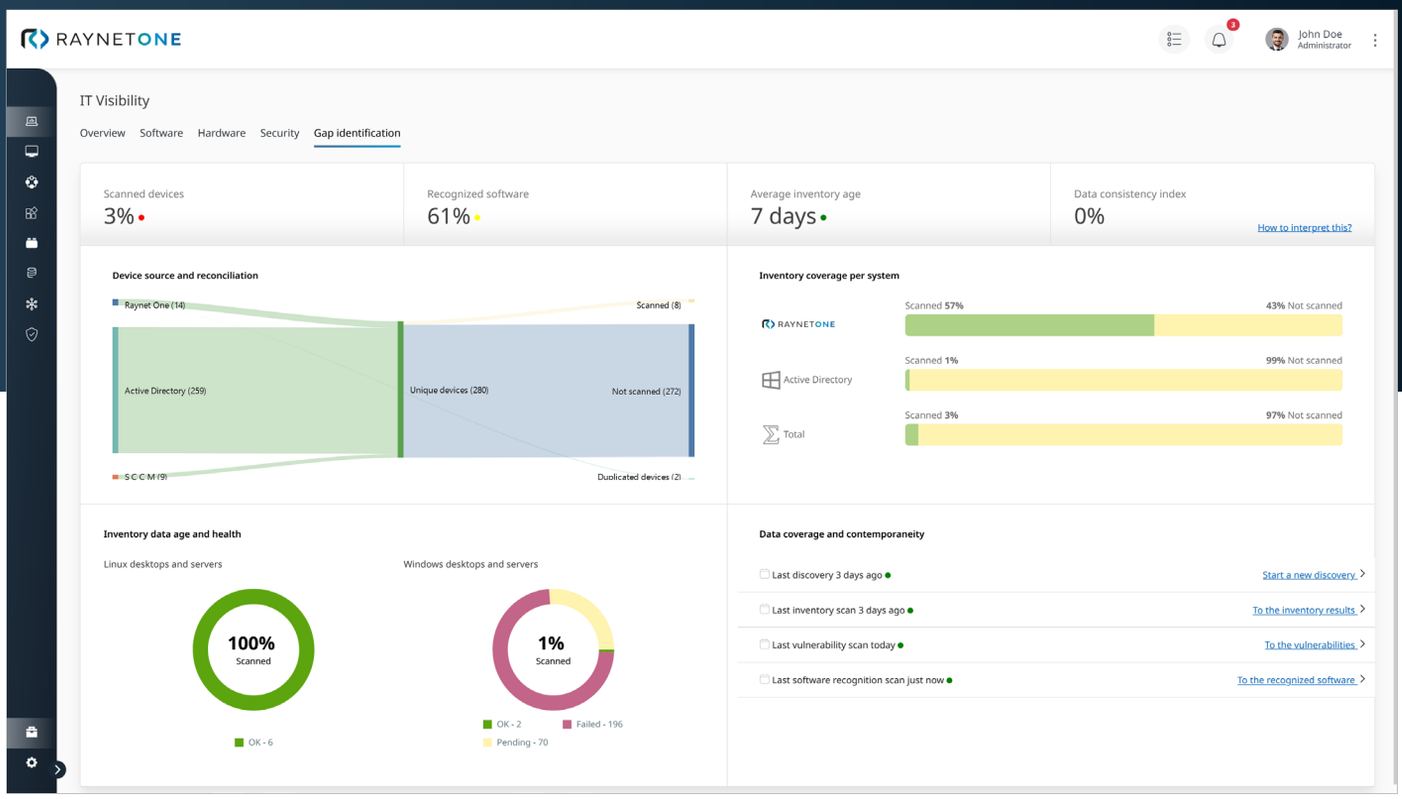
Intelligent enrichment with the integrated Raynet One Technology Catalog adds essential information on business function, license type and latest published version to your data. Raynet One prepares this information and provides valuable insights to reduce software sprawl.

Benefit from active management of your IT portfolio, optimize costs, streamline operations and ensure that your technologies support your strategic goals.

Your benefits

- Get first results on your software assets after just 10 minutes
- Optimize your portfolio and reduce your software costs immediately
- Minimize your support costs through proactive application rationalization
- Improve your compliance and protect yourself from software audits
- Gain holistic transparency about your software and its use

True IT Asset Visibility with Raynet One



Turn your data into actions for sustainable IT decisions

Discover & Inventory › **Protect & Streamline** › **Manage & Visualize**

Why Raynet

Because with Raynet One for True IT Asset Visibility, we create a single, reliable source for all IT assets to protect, optimize and manage complex IT systems.
