// Software Asset Management

Reduce license costs and minimize audit & compliance risks

Are you in control of your licenses and costs?

Constantly changing licensing requirements and increasingly complex licensing models complicate the management and management of **SaaS, cloud** or **on-prem software.**

At the same time, software & IT costs for companies are rising rapidly year after year – by 17% to $196 million in 2023, according to Gartner.

Companies & organizations as well as various stakeholder need a centralized solution to control and **optimize license costs**, **protect** against **audits**, and **ensure** full **compliance** across the enterprise.

Key values from customer projects with RaySAMi:

Compliance	Transparency	Savings
50 %	**100 %**	**30 %**
reduction in software audit response time	transparency over usage, costs & licenses	savings on license & software costs

RaySAMi – the strategic solution for your Software Asset Management

RaySAMi is the strategic solution for minimizing software costs and risks in your IT environments.

Whether it's servers, clouds, clients, virtual machines or mobile devices, determine your exact licensing needs for all major vendors, including **Microsoft, Oracle, SAP®, IBM, VMware, Adobe** and **AWS**.

With powerful analytics, RaySAMi calculates exactly the licenses you need and ensures they are being used effectively. The integrated SAM catalog gives you access to the central database for products (SKU), product usage rights (PUR), and other standardize rules for strategic decision-making.
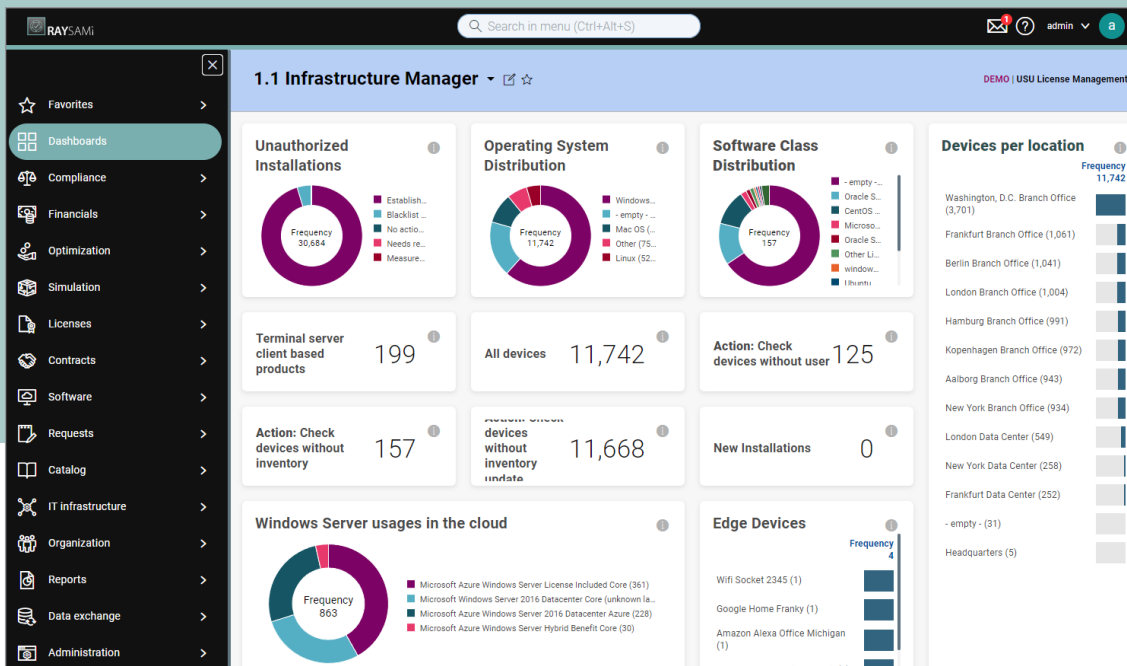

Your benefits

- Minimize your license spend with maximum savings
- Reduce compliance risks through valuable analysis & information
- Prepare for upcoming software audits reliably & securely
- Maintain constant control of your license, support & maintenance costs
- Use trends & forecasts for strategic business decisions
- Compare actual installations with existing licenses & identify over & under licensing
